- □ KDCA stressed that a unified response between health authorities and the public is the only way to reverse the current trajectory of rapid rise in COVID-19 cases.
- First, active participation in social distancing to minimize person-to-person contact.
  - Avoid going out except for essential reasons; especially avoid visiting public venues with a large number of people; cancel all end-of-the-year parties or social plans; social gathering or party plans; spend the winter holidays at home safely with household members only and express love to family and friends through letters or video chat.
- Second, follow infection prevention guidelines in everyday life; wear masks at all times in all indoor spaces in all circumstances, including at work, school, and religious events.
  - In addition to personal hygiene practices such as hand washing, ventilate indoor spaces regularly; disinfect frequently touched objects (remote control, door knob, etc.) often.
- Third, get tested at a screening clinic, temporary testing stations, or respiratory clinics if experiencing any suspected symptoms such as fever or respiratory symptoms.
