## II. Background

In pursuit of the goal of the Paris Agreement and global carbon neutrality, the Republic of Korea has been actively supporting its partner countries to achieve their NDC targets and transition toward a low-carbon economy through climate technology and finance.

As part of this effort, the 8th Seminar on Climate Change Projects and Programs (CCPP) will be hosted by the Ministry of Economy and Finance (MOEF) of Korea.

Since 2015, the CCPP has served as a platform to help Korea's partner countries build capacity in accessing climate finance, and strengthen the network with Korean stakeholders from both public and private sectors in the field of climate technology and finance.

The 8<sup>th</sup> CCPP aims to share recent trends of climate change projects and identify common areas of partnership between Korea and developing countries. Furthermore, a guidebook on ways to work with Korea will be provided to the attendees and other major stakeholders to support the development of actual cooperation projects.
