What our student says

Kwame Agyei, a student in the **Master of Climate Change (MCC)**, is helping his home country, Ghana, see the ‘wood for the trees’ and tackle devastating deforestation

“It’s been a wonderful experience,” he says. “I’ve met interesting people from all over the world, and we’ve shared knowledge and ideas as to what is actually taking place in their countries. I see my class as a mini United Nations. There are people from Nepal, Indonesia, Vietnam, Cambodia, Gambia, Uganda, South America and Australia, of course. At times we found there are similar challenges, and sometimes divergences, with other countries and what they’re experiencing”.
